Range of application

ALUWOOD® panels are wall and ceiling panels that offer different surface materials appropriate for use in public areas where high standards are desired, without lowering the standard of fire safety.

Product description

ALUWOOD® panels are manufactured from sheet aluminium and cladded with a variety of surfaces. **ALUWOOD®** panels are also available in concave and/or convex curved forms with maintained fire resistance.

Dimensions

ALUWOOD® panels are 0.8-3.0 mm thick and can be adapted for a wide range of uses and fire resistance requirements. The panel can be produced to fit the standard supporting frames used with suspended ceilings, or custom-made, for many different applications. The maximum panel size available is 1250 x 3500 mm.
