Range of application

ALUWOOD® Honeycomb is a wall panel that offers different surface materials appropriate for use in public areas where high standards are desired, without lowering the standard of fire safety.

Dimensions

ALUWOOD® Honeycomb has an aluminium honeycomb core with a choice of thicknesses from 6 mm and upwards. The standard thickness of **ALUWOOD®** Honeycomb panels is 10 mm. Custom-made panels are available in sizes up to a maximum measurement of 1250 x 3500 mm.

Recycling

The aluminium sheets used in **ALUWOOD®** products consist of recycled aluminium.

The remelting process does not affect the quality of the aluminium and the process requires only 5% of the amount of energy used in primary metal production. The aluminium from the **AL UWOOD®**
Honeycomb products can be recycled.
